The champion level must not exceed the player level. Level up the characters immediately as you level up your game account. It is best to improve the heroes evenly so that all fighters of the party have equal power. Promotion and increase stardom (Promote). For this type of pumping, use the essence of empiness (obtained from activities, promotions, upon completion of daily missions and daily wish). As the degree of experience is filled, the character increases in the ranking, leading to an increase in indicators of its properties (attack, defense, health, speed). Materials can be selected manually or automatically with 1 click (Quick selection). Each time it reaches level 3, it shall be replaced by the following: After using the gem, the character adds a star, and pumping the ranks of the current stardom begins again in 1. The longer you advance your hero and increase your stardom, the more essential and gems you will need. Awakening. Awakening contributes to the growth of indicators of properties, individual characteristics and skin. To wake up, you need fragments of an identical hero or a hero of the same rank. Awakening progress is reflected in the character card with an Ex icon with a numeric value that shows the number of awakenings made. Each time, the requirements for fragments of awakening become more complicated. Thanks to the equipment, reinforcement. The hero uses 4 types of equipment: wands, helmets, armor and shoes. If you have been able to obtain these more useful equipment in another color, you can safely use it, even if you destroy the on-hand inventory. High-quality equipment compensates for the loss of the bonus. Increase the level of equipment. The level of equipment is determined by the level of the x2 game account. Rune slots are gradually opened as the level of the game account increases: 1 slot - initially, 2 slots - level 40, 3 slots - level 50, 4 slots - level 60, Slot 5 - level 70. Runes come in different levels and properties (res of damage, criticism, health attack, speed, etc.). Depending on the choice of a specific rune, the character receives an appropriate increase in properties. They appear in the form of geometric shapes: triangles, squares and polygons. The more corners a rune has, the higher the level. The red flamboyant jay of the rune indicates that the rune can replace it with a higher quality one. We make Runes. Crafting rare low-level runes allows you to take one rune to the next level. To go to the craft menu on the runes of each hero and then click on Go to combine.
